

The World's Fastest Knot

Effect

Drop a metal ring down a chain necklace and watch as it amazingly ties itself into a knot in less than a second.

Video

Once you register your product at www.threethirtyministries.org/register, you will get a passcode code that will give you access to watch the illusion used and taught.

How to Use

- Hold the ring between your thumb and middle finger (some children use their index finger), in the shape of a C.
- Insert the chain so that it touches the ring between the end of your thumb and the end of your middle finger. The chain needs to touch the ring on opposite sides.
- Bring the ring to the top of the chain.
- Do not move your middle finger.
- Gently slide your thumb up, letting the ring slip off your thumb. Don't try too hard to "let it go," just let it gently slip off. As the ring leaves your hand, it will naturally flip over which is what ties the chain into a knot as it falls.

Spiritual Application

This illusion can be used as a street-witnessing tool to draw attention and engage people in conversations. It can also be used as an illustration for not giving up (perseverance), for not knowing something until you are shown (i.e., Romans 10:13-15), or as a springboard to a conversation about things that are or are not impossible—i.e., "This isn't impossible but some things *are* impossible for us. For example, it's impossible for me to get myself into Heaven without Jesus," etc.

Watch the video for more detailed ways to use this illusion to teach truth and for easy instructions for use. You can also google "Ring Drop Chain Trick" for more uses.
